## SITUATION SUMMARY

### Cal OES Activation Status

| State Operations Center | Inland Region EOC | Coastal Region EOC | Southern Region EOC |
|-------------------------|-------------------|--------------------|---------------------|
| Level 1                 | Level 1           | Level 1            | Level 1             |

#### EF0 Tornado, Waterford, Stanislaus County

- On 04/27/2016, unsettled weather brought funnel clouds and heavy hail to the Eastern portion of Stanislaus County.
- No injuries or major damage was reported. However, there was minor damage to some metal carports and awnings.
- Stanislaus OES monitored the situation but did not activate their EOC.
- The National Weather Service (NWS) confirmed today, 04/28/16, that the funnel cloud was an EF0 tornado that touched down near Waterford.
- An EF0 tornado is defined as causing minor or no damage. EF0 tornados can potentially peel the surface off some roofs, cause damage to gutters or siding, result in branches being broken off trees, and shallow-rooted trees can be pushed over. Confirmed tornadoes with no reported damage (i.e., those that remain in open fields) are always rated EF0.
